

Forward Deployed Delivery

From an ambiguous problem to a reviewed, adopted solution

Audience: technical professionals entering FDE roles. Basic Python familiarity; no paid AI account required.

Learning outcome: assemble a simulated deployment portfolio that connects discovery, implementation, evaluation, adoption and handover.

M01 Outcome ownership

35 planned practice minutes.

M01-L01 The FDE responsibility

M01-L02 Six principles in a decision

M01-L03 A portfolio of evidence

M01-L04 The case and the course boundary

M02 Recon and Immerse

45 planned practice minutes.

M02-L01 The decision behind the request

M02-L02 One ticket through the workflow

M02-L03 Known, assumed, and unknown

M02-L04 The verified Site Map

M03 Frame the decision

45 planned practice minutes.

M03-L01 The outcome line

M03-L02 The bet and change-of-mind evidence

M03-L03 Metrics and guardrails

M03-L04 Operator agreement and scope

M04 Engineer the thin slice

85 planned practice minutes.

M04-L01 A complete path to value

M04-L02 Validation and authority boundaries

M04-L03 Observable suggestions and decisions

M04-L04 Prediction before execution

M05 Sense and decide

40 planned practice minutes.

M05-L01 The first reading

M05-L02 Land, iterate, pivot, or stop

M05-L03 Confounders and honest interpretation

M05-L04 The second reading after adoption

M06 Land and support adoption

55 planned practice minutes.

M06-L01 The six landing checks

M06-L02 The named operating owner

M06-L03 Adoption as a workflow change

M06-L04 Recovery and a bounded rollout

M07 Distill and compound

40 planned practice minutes.

M07-L01 The pattern behind the solution

M07-L02 A reusable technical primitive

M07-L03 A product signal with evidence

M07-L04 Capability after you leave

M08 Judgment under pressure

50 planned practice minutes.

M08-L01 A constraint changes mid-project

M08-L02 One decision for three audiences

M08-L03 Failure-mode diagnosis

M08-L04 Practice and the growth ladder

M09 Capstone engagement

125 planned practice minutes.

M09-L01 A fresh ambiguous engagement

M09-L02 Build, predict, and inject a constraint

M09-L03 The portfolio and scoring rubric

M09-L04 A field extension and the next loop

520 minutes of planned practice. Measured video runtime appears in Media-Manifest.json and START-HERE.md.

Cases, datasets and results are fictional. Narration uses synthetic voices. Completion does not establish accredited competence, customer outcomes or production readiness.
